

Trucker NMO Mount Elevated Feed Antenna

SKU: SP-TRK5-T

Features

The SurePower rugged high-gain wide band cellular NMO antennas deliver powerful performance.

- Tested in "The Great White North" winter environment. Hit by loose gravel; covered in mud and bugs; and went through high pressure washes.
- Designed for professional drivers who demand top performance for their communication devices.
- These antennas offer the highest allowable gain, wide-band versatility (698 2700 MHz) frequencies.
- NMO mount is versatile for any installation on mobile, marine and building use.
- Built-in ground plane allows for use on any surfaces.
- 15.5 inches fiberglass elevated feed mast raises antenna above obstructions and trailers.

Specifications

ELECTRICAL

| Frequency Range (MHz) | 698 - 2 7 00 |
|------------------------|-----------------------------|
| Impedance (Ω) | 50 |
| Antenna Gain (dBi) | 5 |
| VSWR | ≤ 1.9 |
| Signal Pattern (mni) | Omni-directional |
| Polarization | Vertical |
| Ground Plane | Built-in Metal Ground Plane |

MECHANICAL

| 28.25 |
|--|
| NMO Mount |
| Stainless Steel |
| Fiber Glass |
| Aluminum, Nickel Plated Steel and Brass |
| Molded Polymer Jacket |
